## II. Main activities and subsidiaries' performance

### *CMB issues, funding*

In first quarter of 2012, the dilemmas of EU remained unchanged, market judgement on the debt crisis of euro zone has not improved. Thanks to this concerns, the S&P has worsened the rating classification of nine EMU countries. In spite of the uncertainties, the international stock markets performed well throughout the quarter, and the BUX index also increased significantly from February.

In early January, the forint exchange rate against the euro fluctuated extremely and touched a new historical bottom. The forint strengthened gradually in February and by the end of the quarter came back to a "normal" level, but this is primarily due to the favourable international atmosphere after the approval of the Greek rescue package. According to the analysts view, the key of investors' confidence is the EU/IMF-Hungary agreement. There were as extreme high yields at the Hungarian government securities market as in January 2009 but the end of the quarter, these yields decreased. The analysts expect durable correction only after the IMF agreement.

At this hectic and uncertain market situation in January, FHB launched one senior uncovered bond in private placement at 15.4 billion forint face value. The FK17ZF01 bonds are fixed rated and the repayment of the total capital is only at the maturity date.

In February the market environment improved significantly, so the Bank organized more auctions: one CMB (FJ15NF02) was issued at the Stock Exchange's auction and three senior uncovered bonds were issued in the context of a public offering. The face value of the total issued CMB's were 3 billion forints, with the yield of 10.2%. The variable rated bonds (FK15NV01) were sold to the public sector and the two discount bonds maturing in 2014 were sold to institutional investors at 3.6 billion face value. The yields moved between 10% and 10.3%.

In March 2012, FHB launched one issues in the context of public subscription. This new series (FK14NI01) was issued by the Bank to the small investors at 1.5 billion face value. The bonds issued to the public sector are structured, its interest rate bounded to the Hungarian base rate and to the inflation. In the first three months of 2012, 20.5 billion forints uncovered bonds and 3.1 billion forints mortgage bond were issued.

In Q1 of 2012 matured CMBs with nominal value of 0.5 million euros and approximately 25.6 billion forints, senior bonds of 4 billion forints and 50 million euros of state loan. The Bank redeemed approximately 108.5 million euros and 2.7 billion forints CMBs. In the course of Q1 of 2012 a total of 17 series were issued (including four new senior uncovered bonds and one CMB) in the framework of 9 transactions as opposed to 5 transactions in Q1 of 2011. Funds involved by the Bank in Q1 of 2012 amounted to 23.6 billion forints.

the increase of SME loans. Compared to 31 December 2011 (420.3 billion forints) the portfolio was down by 7.7%, primarily as a result of fixed rate early repayments.

Retail loans continued to dominate within the loan portfolio with a contribution exceeding 83%. As of 31 March 2012, 57.5% of outstanding loans were denominated in FX, close to the 58.5% level at the end Q1 of 2011 due to final repayments and exchange rate volatility.

The Bank's consolidated after-tax profit by IFRS amounted to 14 million forints in Q1 2012, 155 million forints less than the Q1 2011 figure and 4.3 billion forints higher than in Q4 2011.

Without the special tax and the one-off loss from final repayments, FHB Group's consolidated after-tax profit by IFRS would have been 720 million forints, 84.2% below the adjusted profit for Q4 of 2011 and 38.9% below the profit achieved in Q1 2011. Profit was sharply influenced by net trading result generating 70 million forints loss in Q1 2011 opposite to significant gain achieved in Q4 2011.

#### Net interest income

Net interest income was 5.6 billion forints in Q1 of 2012, 8.0% down from the performance achieved in the reference period of last year and 37% down from the net interest income without interest on state capital

increase in last period. The fall in net interest income is mainly due to significant drop of loans and narrowing interest margin resulting from rising funding costs. The net figure emerged as a balance of 20.3 billion forints interest income (8.3% up from the Q1 2011 figure and 2.6% below the Q4 2011 figure) and 14.7 billion forints interest expense (16.1% higher than in the same period of 2011 and 12.3% below the Q4 2011 figure, 2.1% down without interest on state capital increase).

In the first quarter of 2012, 43.3% of interest income was contributed by interest on own lending (compared to 45.3% in Q4 of 2011), and 18.5% was contributed by interest on refinanced loans (compared to 20.2% in Q4 of 2011). The interest on interbank loans and securities contributed 14.1% (compared to 7.0% in Q4 of 2011). The contribution of interest income on derivatives was 24.1% to total interest income (as opposed to 27.5% in Q4 2011).

Within the line item of interest income, the contribution of interest subsidy (subsidy of interest on covered mortgage bonds and supplementary interest subsidy) was 15.4% in Q1 of 2012, thus the downward trend of interest subsidies continued (16.0% in Q4 of 2011).

In Q1 of 2012, 39.5% of interest expenditure related to CMBs and 17.3% was contributed by interest on senior unsecured bonds. Interest paid on deposits contributed approximately 16.8%, and interest on derivatives contributed 18.3%. Interest paid on covered mortgage bonds contributed 37.7% in Q4 of 2011 as opposed to 47.5% in Q1 of 2011. Interest paid on senior unsecured bonds contributed 12.2% in Q4 of 2011 and were 15.9% in Q1 of 2011. Interest on derivatives contributed 19.0% to expenditure on interest in Q4 of 2011 and 18.0% in the reference quarter of 2011. In Q4 of 2011, interest paid on deposits contributed 13.0% as opposed to 9.6% in Q1 of 2011.

Net interest margin (NIM) was 2.85% in first quarter of 2012 compared to 1.94% in Q4 of 2011 (or 2.77% without interest paid on state capital increase) and 2.91% in Q1 of 2011. The significant rise of NIM in Q1 2012 was due to interest related to earlier state capital increase paid in the Q4 of 2011 (1.7 billion forints). Without this item, the NIM would rise 9 bp compared to Q4 of 2011.

#### *Net fee and commission income*

In Q1 of 2012, the Bank achieved a positive balance of 904 million forints of income from, and expenditures on, commissions and fees; 26.5% above the Q4 of 2011 achievement and 22.3% more than the Q1 of 2011 net income from fees and commissions. There was an increase in fee income related to lending activity, card services, account related banking charges and money transfer fees.

Income from fees and commissions in Q1 of 2012 was 1,162 million forints, of which 48.8% was contributed by charges related to loans (30.3% in Q4 of 2011 and 20.5% in Q1 of 2011), and 27.9% by accounts and card related banking charges (47.3% in Q4 of 2011). Commissions resulting from the strategic cooperation agreement signed with Allianz Insurance Company contributed 13.8% to fee and commission income in the reported quarter (almost the same as 13.9% in Q4 of 2011).

Agents' fees contributed 34.0% to fee and commission expenditures in Q1 of 2012 (Q4 of 2011: 42.2%); card related fees contributed 34.5% (as opposed to 32.2% in Q4 2011).

Exchange rate volatility in the course of the reported quarter and the effect of short term currency swaps reduced earnings from FX transactions by 1.3 billion forints in Q1 of 2012. The overall result was considerably worse than the 2011 reference figure (129.9 million forints loss) and much lower than the 1.7 million forints profit generated in Q4 of 2011.

Changes in the fair value of securities reported at fair value through P&L was 397 million forints loss in Q1 of 2012, as opposed to 3.4 billion forints profit achieved in Q4 of 2011 and 1.2 billion forints profit in Q1 2011.

71.0% of other expenditure was contributed by the special tax (706.3 million forints, pro rata), what was not included in Q4 of 2011 as of it could be deducted by the loss on fixed rate final repayments, thereby the special tax accounted in 2011 have been recovered by the Group.

Year-on-year decrease appears primarily on personnel expenses (547 million forints), as a result of rationalisation after the successful migration of Allianz Bank – as removal of the parallel positions or closing poor performing branches. The consulting fees shrank by 235 million forints compared to Q1 of 2011, the absence of one-off expenses of migration. By marketing expenditures the increase is more than 55% which is significant – despite of the meaning of the increase is only 44 million forints – because it's showing an increase in business activity.

As of 31 March 2012 the Bank's consolidated balance sheet total by IFRS amounted to 778.9 billion forints, by 37.2 billion forints, or approximately 4.6% down from 31 December 2011 and by 48.0 billion forints, or 5.8%, below the balance sheet total as of 31 March 2011. The year-on-year decline attributed primarily to fixed-rate final repayments could be just partly compensated by conversional loans related to the full repayments. Beside the full repayment drop in the balance sheet total in the first quarter was due to the strengthening of the forint (in the last quarter exchange rate on euro strengthened from 311.13 to 295.6).

The decline on the assets side compared to the reference figures as of 31 March 2011 was the joint result of several factors. It included a drop in interbank deposits of 2.6% and refinanced loans of 22.6% that could be partly compensated by growth in trade securities of 8.1% and decrease in impairment and provision of 36.5% - related to final repayments.

Liabilities decreased by 5.5% compared to the year-on-year figures on the liabilities side. Significant decrease was generated primarily by interbank borrowings (-23.5%), mortgage bonds (-17.7%) and state loans (-52.3%). Additionally in spite of the full repayments, deposits reached 61.2 billion forints growth in Q1. Total amount of bonds grew by 12.5 billion forints.

Shareholders' equity fell by 5.9 billion forint year-on-year primarily owing to the realised losses.

Compared to figures as of 31 December 2011, decline in interbank borrowings of 17.6%, refinancing of 17.4%, own loans of 7.7% and impairment and provision of 19.0% had important impact on balance sheet total. 44.2% increase of bonds offset decline of balance sheet total.

On the liabilities side 10.3% decline of mortgage bonds and 28.8% fall of state loans played a negative role in value of balance sheet total, compensated by improvements in interbank borrowings as of 29.7%, bonds as of 18.0% and deposits as of 11.0%.
