However, in order to present the impacts of actual operation, the analysis and comparative indicators of interim reports are based on the adjusted financial statements that include special banking tax pro rata.

For the information of investors, appendix of this interim report presents the financial statements including the special banking tax for the entire business year and the financial statements that include special banking tax pro rata, as well.

1. Summary of the achievements of the past period

FHB Group's **consolidated balance sheet total** calculated according to International Financial Reporting Standards was 710.4 billion forints as of 31 March 2013, which was 8.8% and 68.4 billion forints less year-on-year; and 42.2 billion HUF or 5.6% down to the previous quarter. Quarterly decrease of balance sheet total was influenced on the asset side by drop of securities, on the liabilities side reduction was generated by repurchase of subordinated bonds issued in the summer of 2012. Net amount of loans decreased slightly (-1.4 billion HUF or -0.3%) in the last quarter, however gross own loans increased by 6.8 billion HUF or by 1.8% quarterly. Amount of refinanced loans fell quarterly and yearly, as well.

Although the growth of loan volume is mainly due to FX rate movements, but the volume of new disbursement both in case of housing loans and corporate loans was significantly higher than a year before. Market share of FHB Group from new disbursement of subsidised housing loans was close to 18%.

Consolidated profit after tax for 2013 Q1 was 1.6 billion HUF loss, net interest income amounted to 4.3 billion HUF. The **average net interest margin** (NIM) was 2.37%, by 46 basis points down year-on-year, but by 31 basis points up to the previous quarter.

Both net interest income and net fee and commission income grew compared to the previous quarter. Net interest income increased by 10%, while net fees grew by close to 90% (without financial transaction levy, by more than 50%) quarter-to- quarter. On the other hand, operating expenses decreased by 2.5% compared to previous quarter. The main reason for unfavourable quarterly result was the significant provisioning volume, primarily because of high FX rate level at the end of March, however the Bank increased further the coverage of non-performing loans.

Performance of FHB shares

In terms of capitalisation, FHB is invariably 8th in the rank of "A" rate listed companies and contributes 0.6% to the aggregate capitalisation of the BSE based on 31 March 2013 data.

2. Main activities and subsidiaries' performance

CMB issues, funding

Global environment was quite ambivalent in Q1 2013. USA announced positive economic trends; real-estate markets have been showing signs of stabilising. But the extent of growth is not expected to be broad enough to stimulate the global market. Contrary Europe's economic expectations are less prosperous. Countries providing best performance (first of all Germany) reported moderate growth, but debts are expected to grow.

The Hungarian economy provided mixed news in Q1 2013: as positive change gearing Hungarian State Treasury (ÁKK) issued 5Y and 10Y FX bonds of 3.25 billion USD in February fulfilling 50% of planned FX bond issuance for 2013. On the negative side less than 1% of GDP growth is forecasted besides growing unemployment rate (adjusted by public work). Also positive is the significant decline in budget deficit as % of GDP fostering resolve of excessive deficit procedure.

New leadership in NBH has been decreasing base rate by 25 basis points. Until the end of March base rate was decreased to 4.75%. Forint weakened due to decreasing base rate but slight change was realised after the last decline. The HUF/EUR exchange rate reached 308 level, as well, and was 304.3 at the end of the quarter. Rate of HUF/CHF closed at 249.96 at the end of Q1 2013. Government ensured that further Forint

weakening is not targeted; but 5Y CDS risk premium, growing from 280 points to 370 points, showing a large uncertainty among investors. Furthermore S&P modified credit rating outlook of Hungary from stable to negative, that means a potential downgrade. As a reason, S&P highlighted the further weakening of institutions and predictability in Hungary.
